

The Automotion® Advantage

Backed by 40 years of experience, Automotion® conveyor and sortation offerings consistently provide a wide range of features which meet the evolving needs of fast paced distribution center environments. With a clear commitment to developing products that routinely excel in a 24/7 operation, these durable conveyor and sortation products have been built to deliver high performance and exceed expectations, with low maintenance requirements.

The Automotion® conveyor and sortation line is useful in various applications and provide for specific needs. In fact, the AutoRoll+™, run-on-demand, motor driven roller conveyor was developed specifically to meet the heightened requirements for sustainability in the warehouse. AutoRoll+™, and the new high speed shoe sorter, the AS20, are perfect additions to the distribution center requiring safe, quiet, and highly efficient conveying and sortation solutions.

Proven Quality Features

Durable construction

- Heavy 10ga frame
- Long life bearings & materials
- Two year standard warranty

Quiet, energy efficient operation

- Noise cancelling axle isolators
- ABEC-1 precision bearings
- Direct drive motors provide maximum energy and minimum noise
- V-Belt slave options reduce motor count
- Power saving 24 volt run-on-demand AutoRoll+™

Protective powder coating

- Hard, baked on finish
- Excellent anti-corrosion properties
- Resistant to chemicals and chipping
- Full coverage of edges
- Durable mechanical properties - elasticity, hardness, impact resistance
- Patented anti-static additive
- Environmentally friendly application and curing process - no volatile organic compound emissions
- Virtually hundreds of colors available - gray and beige standard

Equipment Offering

System Components

Conveyor Products

- AutoRoll+™ 24V MDR
 - accumulation - level, incline and decline
 - transportation - level, incline and decline
 - curves, merges and diverts
 - controlled flow gravity declines
- Belt driven live roller
 - accumulation and transportation
- V-Belt driven live roller
 - curves and straights
- Belt conveyor
 - slider bed and roller bed
- Gravity roller conveyor

Sortation Products

- Shoe sorters
 - Up to 250+ CPM, positive divert
- Arm sorters reliably divert mixed product
 - bow arm, trap arm, flat face arm
- MultiBelt sorters
 - 30° pop-up wheel and 90° pop-up roller
- AutoRoll+™ 24V MDR sorters
 - 30° divert
 - 90° bi-directional right angle transfer
- Right angle pusher for high density diverts

Post Sale Support

The client experience is important to us, and enhanced by the assignment of a Customer Service Representative (CSR) to each project. The CSR becomes an advocate who ensures that every project is successful by reviewing each order and system layout prior to manufacturing. Throughout the process, the CSR continues to work with each of their clients, handling any project updates and presenting future product information and training opportunities.

Automotion® conveyor and sortation equipment routinely provides trouble-free service. As a result, it proudly carries a 2 year warranty. Should technical expertise be required, field technicians are always available to assist with high speed sorter installation and system start-up, as well as for conducting on-site maintenance audits and training.
