

# BLUE GUARDIAN<sup>®</sup>

## PRODUCT PROTECTION

**Exclusively available through Raymond, the Blue Guardian enhances product and pallet protection.** By redirecting the impact of a forklift to the sturdy center block of a pallet, the Blue Guardian reduces product damage often associated with standard direction forklift impact. The Blue Guardian's low-profile polyurethane bumper avoids direct contact with the load to reduce damage to primary and secondary packaging of palletized products. Using the Blue Guardian results in fewer wood splinters, minimizing debris and forklift tire damage.

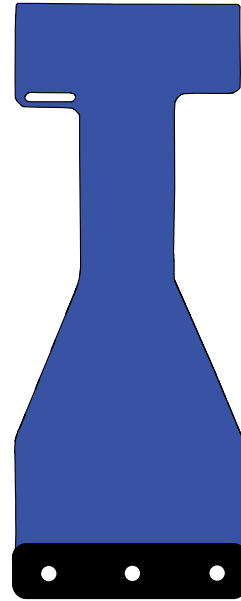

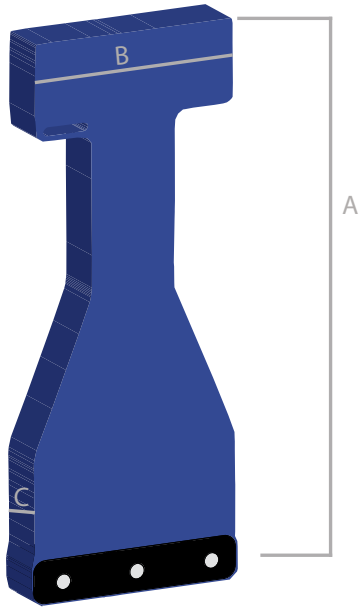

The Blue Guardian is easily installed, without a permanent modification to the forklift needed, and fits standard ITA Class II forklift carriages.

For enhanced pallet and product protection, the Blue Guardian is the solution.
